

the illusion is only for the viewer ...

The unique one technology screen foggy states perfect an alternative for more traditional forms of projection and allows once on always break with screens mounted on permanent. Completely innovative approach combined with the latest prey techniques makes projection unnecessary __ are only : water and dedicated projector . Screen creates curtain with shattered molecules water (type fog), which serves as translucent screen what makes __ paintings on him displayed they pass myself to be suspended in the air . Through the FOG SCREEN you can freely pass no worrying about any _ getting wet because water is broken into microscopically molecules that _ are dry to the touch

AMAZING technology enabling transition by a picture , touching it, and even interacting with it . __ Streams almost invisible couples they make up carrier for picture , and their laminar , i.e. straight structure makes it possible display image high quality . Our modern way on creation laminar flow air on large distances from the outlet couples it does screens steam stable screens foggy available on market .

FOGSCREEN

Mood studio

Using a projector which, on the surface of a pair, allows you to project an image in the air - an image that you can pass your hand through or walk through, but it is not a 3D projection. The image is flat. Possibility to connect control devices to use touch technology.

It's a device that allows on display images in the air on very fine layer air with increased humidity . FogScreen is a device built in form trapezoid and generating top - down screen ideal _ _ vertically . This solution allows the user no just on gear ratio hand by picture , but also on touching it, and even on interacting with the displayed item picture .

Screen steam - COVID - 19

We introduced innovative method exploitation screen with the application fluid EcoFog .
It is a disinfecting fluid and disinfection of e.g. people people passing by by our screen .
In this moment the device is not only an attraction but also fulfills important in today
world values security .

FOGSCREEN

Possibility orders devices in 3 sizes :

3000X2400mm

1800X2400mm

1200X950mm

230VAC power supply 300 W MAX

Tank on water 5l

Weight from 35-145 kg
